## FIRE LANE DESIGN GUIDELINES

**Minimum** fire lane width 24'. **Minimum** vertical clearance 14'.

Emergency vehicle turn-arounds if required must have a **minimum** diameter of 100'.

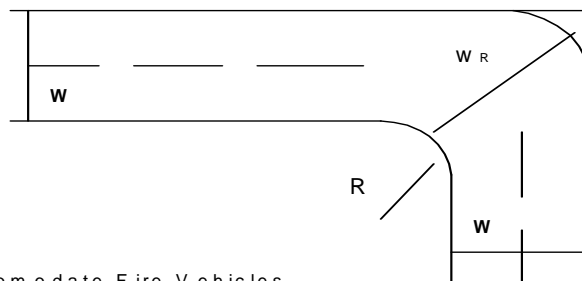

Fire Lanes must extend to within 150' of all portions of the exterior walls of the first story.

Fire Lane striping to be continuous red 6" base with 4" white lettering "FIRE LANE NO PARKING"  
 Fire Lane striping/lettering to be placed on flat surface of roadway and on vertical surface of curb where curbs are present.

### FIRE LANE DESIGN

W	R	W <sub>R</sub>
20'	30'	30' min
25'	20'	30' min
30'	10'	30' min

W = Width (Feet) of Fire Lane  
 R = Radius Necessary to Accomodate Fire Vehicles  
 W<sub>R</sub> = Turning Radius Pavement Width
